

SPSS Amos 20.0 Fix Pack 1 Fix List

Release notes

A comprehensive list of defect corrections for the SPSS Amos 20.0 Fix Pack 1. Details of the fixes are listed below under the tab for the respective Fix Pack. If you have questions about a particular defect, please contact Customer Support.

Note: each successive Fix Pack is comprehensive and contains the material from the earlier Fix Packs for that Release, as well as all Interim Fixes made available since the previous Fix Pack or full Release. In other words, when multiple Fix Packs are available, you would not need to apply Fix Pack 1 before applying Fix Pack 2.

Issues corrected since SPSS Amos 20.0 Release	
Number	Description
<u>PM49711</u>	Path diagrams saved by AMOS 20.0 can now be opened in earlier versions.
<u>PM59398</u>	Installing AMOS 20.0 FixPack 1 will now preserve the DaemonHost value in spssprod.inf when applied to network-licensed installation provided install is done with full admin rights (XP) or right-click->Run As Admin (Vista, 7). If insufficient rights are present, a warning will be displayed on completion of the install, and a backup copy of spssprod.inf named "spssprod_amos20.0.inf" is saved to the user's My Documents folder. Simply manually copy the backup into the AMOS install directory and rename back to "spssprod.inf".
<u>PM59417</u>	Successive runs of Models with missing data no longer return negative chi-square values in certain regional locale settings.
