

SPSS Data Collection 6.0 FP3 Fix List

Release notes

Abstract

A comprehensive list of defect corrections for fix packs of SPSS Data Collection 6.0. Details of the fixes are listed below. If you have questions about a particular defect, please contact Customer Support.

Content

Note: This list contains a combination of APAR references and internal defect numbers. This was necessitated to provide a complete list of corrected defects as we continue to transition our internal defects to APARs. Future Fix Lists will only contain APAR references. Items with a PM reference are APARs and are searchable on IBM.COM.
